WORK EXPERIENCE

Sr. Technical Consultant | Vanguard Business Solutions & Consulting   Mar 2022 - Aug 2024

- Lead and manage technical aspects of SAP B1 implementation projects, including project planning, resource allocation, and project delivery.
- Design, develop, and deploy SAP B1-based solutions to meet specific customer requirements, using SAP B1 SDK, SAP B1 DI API, and SAP B1 HANA.
- Work closely with functional consultants and end-users to understand business requirements and translate them into technical solutions.
- Provide technical guidance and support to junior technical consultants, ensuring the quality and accuracy of their work.
- Conduct training and knowledge transfer sessions for end-users and technical team members on SAP B1 technical modules and components.
- Participate in pre-sales activities, including scoping and estimating technical requirements for SAP B1 projects, and creating technical proposals and presentations.
- Collaborate with cross-functional teams, including project managers, functional consultants, and technical consultants, to ensure successful project delivery.
- Troubleshoot and resolve technical issues with SAP B1 systems, including performance tuning, database optimization, and system monitoring.
- Keep up-to-date with the latest SAP B1 technical modules, components, and tools, and apply them to improve project delivery and quality.
- Contribute to the development of best practices and standards for SAP B1 technical consulting services.

JAVA ENGINEER | NEXIDEA Co.,Ltd   Sept 2019 - Dec 2022

- Design, develop, test, and deploy Java Spring-based applications using Spring Boot, Spring MVC, and Spring Data.
- Collaborate with cross-functional teams, including product owners, UX designers, and other developers, to identify and prioritize features and requirements.
- Develop RESTful APIs using Spring frameworks, including Spring Security and Spring Integration, to integrate with third-party systems and applications.
- Develop front-end components using modern front-end technologies, such as AngularTS or React, and integrate them with Spring back-end applications.
- Write high-quality, maintainable, and scalable code following established coding standards and best practices.
- Participate in code reviews, providing constructive feedback and suggestions to other developers.
- Debug and troubleshoot issues in production and non-production environments, including identifying the root cause and implementing effective solutions.
- Develop and maintain unit and integration tests to ensure the quality and reliability of the software.
- Work in an Agile development environment, participating in daily stand-ups, sprint planning, and retrospectives.
- Continuously learn and keep up-to-date with the latest Java Spring technologies, components, and best practices, and apply them to improve project delivery and quality.
- Collaborate with other developers and technical team members to share knowledge and contribute to the development of best practices and standards for Java Spring development.

WEB DEVELOPER | CLOUDSOURCE MYANMAR COMPANY LIMITED   Jun 2017 - Nov 2018

- Work with senior developers to develop, test, and deploy Ruby on Rails-based web applications.
- Write code following established coding standards and best practices.
- Develop front-end components using HTML, CSS, and JavaScript, and integrate them with Rails back-end applications.
- Debug and troubleshoot issues in production and non-production environments with the help of senior developers.
- Participate in daily stand-ups to report progress and identify potential roadblocks.
- Learn and keep up-to-date with the latest Ruby and Rails technologies, components, and best practices, and apply them to improve project delivery and quality.
- Follow established development processes and contribute to the development of best practices and standards for Ruby and Rails development
