SUMMARY

Experienced SAP Business One Technical Consultant and Backend Engineer with 8 years of expertise in ERP solutions and backend development. Skilled in customizing SAP Business One, backend technologies (SQL, HANA, PostgreSQL, C#, ASP, VB), and system integrations. Proven ability to enhance business processes and deliver efficient, scalable solutions.

WORK EXPERIENCE

VANGUARD BUSINESS SOLUTIONS & CONSULTING   **Mar 2022 - Aug 2024**

• Led a team of 5 developers to implement SAP B1 projects, increasing client revenue by 20%.

• Designed, developed, and deployed custom SAP B1 solutions using SAP B1 SDK, SAP B1 DI API, and SAP B1 HANA.

• Delivered tailored solutions for 15+ clients, ensuring their specific business needs were met.

• Achieved a 95% customer satisfaction rate through successful project delivery and support.

NEXIDEA Co., Ltd   **Mar 2019 - Dec 2021**

• Designed, developed, tested, and deployed Java Spring-based applications using Spring Boot, Spring MVC, and Spring Data, resulting in a 20% increase in system performance and a 50% improvement in scalability.

Developed RESTful APIs with Spring frameworks, including Spring Security and Spring Integration, to seamlessly integrate with third-party systems and applications.

CLOUDSOURCE MYANMAR Co., Ltd   **May 2017 - Dec 2018**

• Collaborated with senior developers to develop, test, and deploy Ruby on Rails-based web applications, ensuring high-quality code and efficient project delivery.

• Wrote clean, maintainable code in accordance with established coding standards and best practices to enhance application performance and readability.
